Deck is attached (as shared file, so please feel free to go in and edit as you see fit). It largely follows the issue paper and many of the slides should be familiar as they are versions of the slides previously circulated. I've been watching comments on the paper and have tried to incorporate all those that I have as of 2:30 into this document. I will make sure to reflect additional comments on the paper as they are received.

Erin/Bob,

Please note I left a slide for you. If you don't want it there, you can delete, relocate, use, or expand as you see fit. My recollection is that this is a 30 minute briefing, but if needed I think you've already briefed Alex, so we could fly through the early background slides if you want to at least recap your procedural recommendations.

Thanks all for the really quick response!

Donna
